DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Clancy et al. (US Patent 5,168,427)

As per claim 1, Clancy discloses an electronic apparatus to which an input device is connected, comprising:

- A main unit(10);
- A display unit(32) rotatably attached to the main unit(14); and
- A retaining mechanism retaining at least one portion of the input device
 into a space which is formed by between the display unit and the main unit
 when the input device is not used, wherein the input device is removable
 from the space. (wherein pin 46, latch assembly 54), (fig.3, col.3, lines 316, release the lock input device pop up from space)

As per claim 2, Clancy discloses wherein the retaining mechanism comprises at least one supporting member (80).

As per claims 3, 5, Clancy discloses wherein the retaining mechanism further comprises a supporting member (80) is mounted so as to be storable in the main unit when the input device is not being stored.

As per claim 4, Clancy discloses wherein the retaining mechanism comprises an engaging member (46) engaging the main unit(14) and the input device(10).

As per claim 7, Clancy discloses an input device 10 detachably connected to an electric apparatus having a display unit 32 rotatably attached to a main unit 14, the input device comprising at least one engaging member engaging the main unit so that at least one position of the input device is retained into a space which is formed between the display unit and the main unit, wherein the input device is removable from the space. (fig.3, col.3, lines 3-16, release the lock input device pop up from space)

As per claim 8, Clancy discloses an electronic apparatus, comprising:

- A main unit(14);
- A keyboard (10) detachable from the main unit;
- A display unit (32) rotatably attached to the main unit, and
- A supporting member (80) rotatably mounted to the main unit to hold the keyboard against the main unit when the supporting member is lowered from the main unit and the keyboard is mounted on the supporting member, wherein when the keyboard is mounted on the supporting member and the display unit is rotated down, the keyboard 10 is disposed in a space between the display unit 32 and the main unit 14, wherein the input device is removable from the space. (fig.3, col.3, lines 3-16, release the lock input device pop up from space)

As per claim 9, Clancy discloses a main unit used for an electronic apparatus to which an input device is connected, the electronic apparatus having a display unit (32) rotatably attached to the main unit(14), the main unit comprising a support member (80), wherein the support member projects from a from surface of the main unit into a space formed between the display unit (32) and the main unit, so that at least one portion of the input device is retained into the space when the input device is not used, and wherein the input device is removable from the space. (wherein pin 46, latch assembly 54), (fig.3, col.3, lines 3-16, release the lock input device pop up from space)

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clancy et al. (US Patent 5,168,427) in view of Kimura et al. (US Patent 6,108,716)

Clancy discloses all the limitations as above except an electronic apparatus further comprising detector detecting each of a storage and a removal operation of the input device and controlling predetermined operation of the electronic apparatus according to signal of detector. However, Kimura discloses detect sensor which detects keyboard is mounted on the system, terminals which send or receive signals to or from terminal for keyboard of system. (col.10, lines 24-42)

It would have been obvious to one having ordinary skills in the art at the time the invention was made to incorporate Kimura's teaching into Clancy's method so as to provide a data processing unit which stabilizes the system, with the keyboard detached from the system regardless of the position of the display unit with respect to the system. (col.1, lines 45-50)

Response to Amendment

4. Applicant's amendment filed on 12/17/03 have been fully considered but are not place application in condition for allowance.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
